++ Peace Country Minerals by Trouw Nutrition Canada are packaged in the Hi-Pro Feeds branded Mineral/Premix bag.

Mineral Supplementation Tips:

- Intakes are higher and more consistent with loose salt compared to block salt.
- Force feed mineral and salt when possible. Boost supplementation rates from late pregnancy through to breeding season.
- Keep mineral fresh and offer cattle 1 -2 times/week to avoid leaching and hardening caused by moisture
- Keep fresh mineral inventories. Mineral containing vitamins should not be stored for more than 2-3 months.
- Use minerals to manage pastures. Place mineral feeders in under-utilized areas, but not too far away from water as mineral consumption may be reduced.
- Mineral stations are excellent locations for oilers, mops or dusters for fly control.
